PURE WATER - A Rarity !

Water is life, Something without that life cease to exist. Pure and clean water nurture our body and soul. Bottled mineral water is expensive, inconvenient and may be spurious. The other available UV based water purifiers only partly clean the water as they cannot remove the hardness of water. Thus quenching one's thirst in real sense always remains a dream.

WHAT IS WRONG WITH MY DRINKING WATER ?

Water we drink may contain various Physical, Micro-Biological, Toxic Chemical & Dissolved impurities extremely harmful to our body. See below column for a description of some harmful impurities that may be present in your drinking water system.

DANGEROUS WATER BORNE IMPURITIES

Fluoride	: Borne disease & ugly patches on the teeth	Nickel	: Kidney damage / Respiratory problems
Bacteria/Virus	: 80% of water disease		High risk of cancer
Suphates	: Dehydration / Gastrointestinal irritation	Sodium	: High Blood Pressure
Magnesium	: Digestion related diseases	Calcium	: Kidney Stone
Nitrates	: Blue baby syndrome	Potassium	: Electrolyte imbalance
Lead	: In Children : delayed development of mental and physical faculties	Pesticides	: Cancer, Nervous, system damage, Birth defects

6 Stage Water Purification System

1.Pre-filter Cartridge

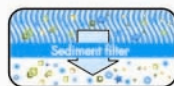

Removes suspended impurities in water like sand, dust, dirt, rust, silt etc.

2.Anti-Scaling

Anti-saline: Dilutes hardness by removing unnecessary salts.

3.Sediment filter

Removes Smaller Contaminants and any other remaining particles-protecting the RO Membrane.

4.Pre-Carbon filter

Eliminates colour, odour, free chlorine and also absorbs insecticides and pesticides.

5.Reverse Osmosis

Eliminates toxins, chemicals, More than 90% Total Dissolved Solids (TDS) viruses and bacteria.

6.Post-Carbon Filter

Restores the natural taste of water.
